

Battery Break-a-way Kit/Battery Box

New rugged battery box takes the wear and tear of trailer life

Finally, the right solution for trailer battery installations. Carlisle Industrial Brake introduces a new battery box that is easy to install, easy to access and built to take the weather and shock of trailer life. This newly designed box is the perfect fit for Carlisle's HBA-EBA battery break-a-way kit used with the ElectraStar® and HydraStar® XL trailer brake actuators. Carlisle's box also is ideal for other systems requiring a higher Amp/hr. battery. The new molded box is made of weather and shock resistant glass filled nylon. This new product is available in three kits: HBA-EBA box, battery, and break-a-way switch; HBA-BBO box and battery; and the HBA-BNB box alone. See your Carlisle distributor or visit our web site, www.carlislebrake.com for more information.

Battery Box Specs:

- Extra strong glass filled nylon material for weather and chemical resistance, including brake fluid
- Mounts easily from the side or through the bottom
- Two piece molded design provides easy access to the battery
- Dimensions: 10-7/16" X 7-3/4" X 3-7/8"
- Shipping Weight: 2.9 lbs.

Battery Specs:

- 12 Volt – 17 amp hour rating
- Sealed lead acid – No maintenance
- Dimensions: 7-5/8" X 6-9/16" X 3"
- Shipping Weight: 15.3 lbs.

Choose from one of three available kits:

Model HBA-EBA
